EXCEPTIONAL QUALITY - EXCEPTIONAL VALUE

WARRANTY

The Feighner Company, Inc. (TFC) will warranty* all welds on dock frames for the lifetime** of the original purchaser. This does not include accessories.

TFC Warrants the entire structure of all TFC lifts, docks and accessories to the original owner for a period of 2 years when purchased new and used for residential use.

In addition, The Feighner Company, Inc. will warranty all welds on TFC lifts for a period of 15 years.

All warranty items must be returned to TFC freight prepaid and the warranty item will be reshipped freight collect.

TFC reserves the right to repair or replace any warranty item.

All warranty issues are administered through the selling dealer, with TFC acknowledgment. The warranty is for the original owner and is not transferable.

The warranty includes a labor component. However, not all items fall into this category including most cables. TFC expects the customer to replace any part, accessory or structure that is "bolt on." TFC will reimburse to the dealer warranty labor when the warranty item in question requires this.

The warranty labor component will be honored for the first 2 years.

TFC is not liable for damages or injuries as a result of misuse, neglect, installation, removal, or the purchase of inappropriate selection of style or weight capacity of one of our products.

Hydro-Max hydraulic pumps, remotes, hoses and fittings have a 2 year warranty.

Feighner Boat Lifts and Docks are not intended for Salt Water Use.

Specifications are subject to change without notice.

Feighner Docks are not intended for diving applications.

*War-ran-ty noun: A legally binding guarantee attesting to the quality and durability of a product.

**Life-time noun: The period of time during which an individual is alive.

ABOUT US

The Feighner Company (TFC) was initially started in 1969 as a small family farm in Nashville, MI. By 1973 the company had grown into a significant farming and custom hay baling operation farming hundreds of acres and specializing in wheat, alfalfa and timothy hay. As 1979 approached, the company had hired its first full time employee to help farm hundreds of acres and to transport its own hay crops throughout the United States.

In 1982, as the company continued to grow, a second building was constructed to house offices and a retail feed store on the family farm. In 1987 The Feighner Company became incorporated as a Michigan Corporation.

In 1990, Scott's father wanted to see which manufactured docks were available for purchase for the family cottages in northern Michigan since the traditional wooden framed dock was failing. Scott located a rolling dock manufacturer that looked interesting and contacted them to purchase a dock. This evolved quickly into TFC selling products for that manufacturer.

Over the next several years it became very apparent to Scott that there was a huge opportunity to manufacture aluminum docks and lifts to the highest standard available and supply an excellent warranty to the customer. Scott decided that if he was going to stay in the dock and boat lift business he was going to make his own design modifications and provide impeccable customer service and warranties on all products that had the Feighner name.

In 2006, The Feighner Company moved to Charlotte, MI to a much larger facility with better manufacturing opportunities. This building was expanded upon in 2010 to add more product storage and was expanded again in 2012 and 2013.

Today TFC manufactures Hydro Max II Hydraulic Boat Lifts as well as Feighner Vertical and Cantilever Boat Lifts. TFC also manufactures Feighner Rolling Docks, North American Standard Docks, Floating Docks, Sectional Docks and Accessories. TFC currently exports to Europe, The Middle East and Canada. We build and market docks and lifts all year around, not just on a seasonal basis. TFC always stands behind their products, which keeps our customers continually coming back for new innovative boat lifts and docks and excellent service.

The two TFC key components to quality are our employees and the TFC manufacturing controls.

Our employees are Number 1. They are full time and the employees building your new Feighner boat lift and dock have built hundreds of units before yours. They genuinely care about your new boat lift and dock being built to your satisfaction.

TFC "in house" manufacturing is Number 2. TFC controls every aspect of our manufacturing processes. TFC manufactures every part that is utilized in a Feighner boat lift and dock. Every Feighner boat lift and dock is manufactured by TFC employees in Charlotte, MI. There is no "passing the buck" at TFC. TFC fully stands behind their products.

The Feighner Company is still a family corporation and would like to invite you to stop by for a tour of our facility and to meet the family and staff.

VERTICAL CABLE BOAT LIFTS

- TRIANGULATED SIDE STRUCTURE FOR EASY BOAT ACCESS
- HEAVY DUTY ROLLER MECHANISM KEEPS BED ON TRACK AND ELIMINATES BINDING
- SUPER FLEXIBLE BRAIDED STAINLESS STEEL AIRCRAFT CABLE

- HEAVY DUTY CHAIN DRIVE WINCH
- QUIET LONG LASTING NYLATRON SHEAVES WITH STAINLESS STEEL BUSHINGS
- 5/16" STAINLESS STEEL CABLE 45% STRONGER THAN THE COMPETITONS 1/4" CABLE
- THE SHALLOW WATER VERTICAL BOAT LIFT
